**JS PARTS SUPPLY SDN. BHD.** Has been involved in excavator spare parts business since Year 2009. We do have comprehensive range of products such as hydraulic pump parts, undercarriage parts, engine parts, hydraulic seal kit, bucket attachment parts and others.

Our products range are covering all models for Hitachi, Komatsu, Kobelco, Volvo, Sumitomo, Mitsubishi, Caterpillar, Doosan, Kato, Hyundai, Samsung, Kubota, IHI, Yanmar and others.

To ensure customers be able to purchase quality parts with reasonable price from us, we've carefully selected quality manufacturers and suppliers from different countries. Such as Korea, Italy, Dubai, China, Taiwan, Japan, India, Singapore and others.

[www.jsparts.com.my](http://www.jsparts.com.my)

50 years of production experience bring us 100% of the confidence and 200% of the quality assurance. Relying on the successful technology of Japan, we adopt the same quality management method as Japan to produce the same quality products.

Our unique heat treatment method can improve the wear resistance of the track link, enhance the toughness of the pin sleeve and prolong the service life.

We have developed new Link gasket seal with Japan's famous manufactures. Unique seal ring shape can assure optimal sealing and extend the service life of link pin. Yutani's products have been welcomed by Japanese and other overseas customers. We implement strict quality management and constantly pursue high products. With a view comprehensive management, we have absolute confidence with the quality of our products.

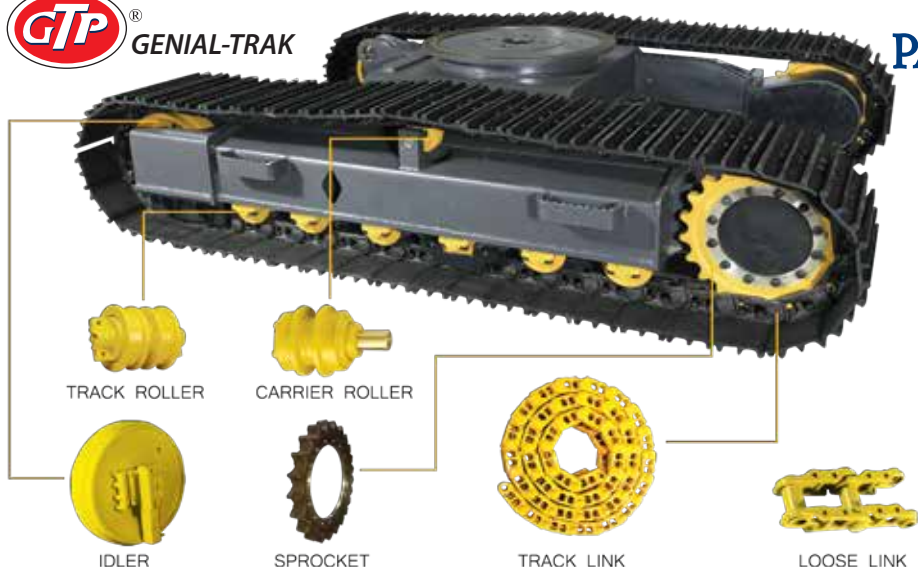

# UNDERCARRIAGE PARTS:

GENIAL-TRAK

PARCO®

The "GTP" brand do have almost complete range of undercarriage parts for excavators and bulldozers. Our manufacturer also keep upgrading the products quality and developing new products for every new models. Mini excavator's undercarriage parts also have been developed and made us a one stop solution for undercarriage parts.

## New Improved Quality Product

"PARCO" is slowly eliminating the current "casting type" sprocket and developing "FORGING TYPE" which having the same quality as genuine parts.

This Forging Sprocket has more solid material bondings and able extend it's lifespan 2 to 3 times compared with the normal type.

# ADAPTOR & BUCKET TOOTH SERIES

 brand excavators bucket tooth and adaptors are manufactured by Ningbo Zhedong Precision Casting Co., Ltd. Special materials have been researched and developed to produce high quality bucket tooth and adaptors for different working environments. Soil, sand, hard rocks and others.

TIGER type bucket tooth uses special enhanced materials, difficult to be bended or break. Suitable for excavating hard objects like Iron steel, rocks and others.

SK type is using the highest grade of material among  products.

**Special Features:** Excavate hard objects, gain extended lifespan.

RIPPERS are for bulldozers, heavy duty usage. Product lifespan are comparable with Italian made products.

 **ADAPTORS** are using special material that maximised product lifespan and minimised wear and tear to maintain the fitting gap between adaptors and bucket tooth.

 products have become world recognised brand name. Currently it already reached the same quality standard with Italian made products and has been listed in world's rankings. products have been supplied to various of OEM excavator manufacturers.
